

# SG HYPO GROUT

## Two-Component Epoxy Tile Grout

SG Hypo Grout is a high-performance two-component epoxy grout designed for superior chemical resistance, high compressive strength, and long-lasting joint protection for ceramic, porcelain, vitrified tiles, and natural stones.

### Usage Details

| Application Area       | Usage Context             | Suitable For                             | Joint Type           | Coverage               | Packing Sizes                 |
|------------------------|---------------------------|------------------------------------------|----------------------|------------------------|-------------------------------|
| Floor                  | Interior                  | Ceramic Tiles                            | Epoxy Grouting       | Depends on Joint Size  | 1 Kg, 5 Kg<br>Two-Part System |
| Wall                   | Exterior                  | Porcelain & Vitrified Tiles              | Narrow & Wide Joints | Depends on Joint Width |                               |
| Wet & Commercial Areas | High-Traffic Applications | Swimming Pools, Bathrooms & Mosaic Tiles | Heavy-Duty Joints    | Site Dependent         |                               |

### Technical Details

| Conforms To                                       | Physical Form      | Chemical Resistance | Adhesion Strength      | Compatibility                    | Packing Sizes |
|---------------------------------------------------|--------------------|---------------------|------------------------|----------------------------------|---------------|
| IS 17190:2020<br>Type RG1 ANSI A118.3<br>EN 12808 | Translucent Liquid | Excellent           | Superior Bond Strength | Compatible with All Cement Types | 1 Kg & 5 Kg   |

**100%  
Stain Free**
