

SG IWC (Integral Waterproofing Compound)

Liquid Waterproofing Admixture for Concrete & Mortar

SG IWC is a high-performance lignosulphonate-based integral waterproofing compound that reduces water demand, improves concrete and mortar strength, minimizes segregation and bleeding, and provides long-lasting waterproofing throughout the mix.

Usage Details

Application Area	Usage Context	Substrates	Application	Dosage	Packing Sizes
Concrete	Internal	Cement Concrete	Concrete Mix	100-125 ml / 50 kg Cement	1,5,10,20 & 50 Ltr.
Mortar	External	Cement Mortar	Mortar & Screed	Recommended	Containers
Screed	Waterproofing	Render & Plaster	Roof Slabs		
Plaster	Repair & Construction	RCC Structures	Water Tanks, Basements		

Technical Details

Conforms To	Physical Form	Color	Coverage	Application Method	Standards
IS 2645 : 2003	Liquid	Dark Brown	As per Dosage	Mix with Water Before Concrete Mixing	IS 2645 : 2003
