

SG ANTICORO PAINT

Anti-Corrosive Protective Coating

SG Anticoro Paint is a high-performance anti-corrosive protective coating specially formulated for structural steel and reinforcement bars. It forms a durable protective layer that enhances corrosion resistance, improves adhesion, and protects steel against moisture, chlorides, and sulphates.

Usage Details

Application Area	Usage Context	Substrates	Coverage	Packing Sizes	Colour
Reinforcement Bars	Anti-Corrosion Protection	Structural Steel	Approx. 100 Kg of 12 mm Steel Bar	1 Ltr.	White
Structural Steel	Protective Coating	Embedded Steel in Concrete		10 Ltr.	
RCC Structures	Before Concrete Repair	Concrete Reinforcement	Approximate*	20 Ltr.	

Technical Details

Conforms To	Physical Form	Solid Content	Coating Thickness	Inter Coat Interval	Finish
Anti-Corrosive Coating Standard	White Emulsion Paint	>50%	110 Micron	Minimum 4 Hours	Smooth Finish
