

SG COARSE PUTTY

White Cement-Based Wall Putty

SG Coarse Putty is a premium white cement-based wall putty made with white cement, polymers, carefully graded fine aggregates, and biocides. It provides a smooth, strong, and durable surface by leveling uneven walls, improving paint coverage, and offering excellent water resistance.

Usage Details

Application Area	Usage Context	Suitable Surfaces	Coverage	Coat Thickness	Packing Sizes
Interior Walls Exterior Walls Ceiling	Wall Levelling Before Painting Surface Preparation	Concrete Walls Rendered/Plastered Walls Hollow Bricks Precast Walls Concrete Ceilings Calcium Silicate Bricks	4-5 Sq.Ft./Kg @ 3 mm Approximate*	Up to 3 mm (Single Coat)	40 Kg

Technical Details

Physical Form	Colour	Mixing Ratio	Inter Coat Interval	Full Curing Time	Water Requirement
Free Flowing White Powder	White	3 : 1 (Powder : Water)	4 Hours	14 Days	As Required
